SUMMARY

I created a tech startup in 2015 and have been in love with the industry ever since. A family emergency pulled me away from coding for a while, but I'm eager to get back into this space!

SKILLS

Languages
Python
JavaScript
SQL
HTML / CSS

Frameworks & Libr.
Flask
Node.js
React.js
Redux

Tech
Git
Data Structures
Algorithms
Photoshop

Other
Sales
Management
Communication
Business Development

PROJECTS

MechFinder (see below)   2015-2017

Pretty Fast Books (Simplified Quickbooks) *Springboard Capstone Project*   *Dec 2020*
- Utilized Plaid API to securely upload user transactions.
- Utlized Python, Flask, and SQL to allow users to categorize their transactions and create personlized budgets. Also uses Charts.js to help user visualize their spending habits.

MyVaccineExperience.org   *Sept. 2021*
- Tried looking for stories/statistics to help me decide which vaccine to take, but a site like this didn't exist. So I made it...
- Utilized Express, React, PSQL, Jest, Heroku and more.

EXPERIENCE

Solusion Inc.: Sales Manager & Commercial Project Developer   *Apr 2018 - Present*
- Started as a regional solar sales manager and ended up creating an entirely new commercial LED lighting division within the company.
- Became the premier lighting installer for car dealerships in Southern California within 18, working with companies such as Penske, Myers Auto Group, Moss Bros, and more!

Tesla Energy: Solar Energy Consultant   *Feb 2017 - Apr 2018*
- Responsible for customer acquisition, sale, and retention.
- Was 12th in our 4-state region by 2nd month and broke $250,000 in sales by month 3.

Stelian Onufrei for Congress: Senior Data Analyst   *Sep 2017 - May 2018*
- Gathered, tracked, and managed both internal data and that of the 550,000+ registered voters in our district.

MechFinder.com: Tech Startup Cofounder   *Jan 2015 - Feb 2017*
- MechFinder is a comprehensive social platform that connects customers in need of car repair with local qualified mechanics.
- Managed the development team, established the business infrastructure, created the marketing & reputation management systems, negotiated startegic partnerships, & more.
- Utilized NodeJS Express, MongoDB, handled secure user authentication & data storage, handled linking socket connections for real-time notifications & chat services, utilized Google Cloud to deploy app, and more.

EDUCATION

Springboard Software Engineering Bootcamp   *Certification – Sept. 2021*
- 800 hour intensive course in Software Engineering methodologies and technologies

Glendale Community College   *Associates (3.95 GPA) - 2012*
- Honors & Phi Theta Kappa Graduate (Dedicated to top 5% of grads)
